Ideation Phase
Brainstorm & Idea Prioritization Template

Date	**02 November 2026**
Team ID	PNT2022TMIDxxxxxx
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Use this template in your own brainstorming sessions so your team can unleash their imagination and start hoping concepts even if you're not string to the same room.

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Self	Driver performance comparison across seasons	Analysis	1
2	Self	Team championship trend visualization	Trend	2
3	Self	Race outcome prediction using historical data	Predictive	1
4	Self	Interactive dashboard with filters (Season, Team, Driver, Track)	Dashboard	3

Step 2: Idea Prioritization

Rate each group's idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/ Low)	Importance (High/Medium/ Low)	Priority	Selected (Yes/No)
1	Driver performance comparison & race prediction	High	High	1	Yes
2	Team championship trend visualization	Medium	High	2	Yes
3	Interactive dashboard with filters	High	Medium	3	Yes

Ideation Phase
Define the Problem Statements

Date	01 November 2026
Team ID	SB-F1-01 (Individual)
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	*Describe customer with 3-4 key characteristics, needs or role*	A Formula 1 fan, sports analyst or event follower who wants clear and reliable race insights.
I'm trying to	*List the outcome or "job" customer wants, what are they trying to achieve?*	Analyze driver and team performance, compare results across races and seasons, and understand key race trends.
but	*Describe what problems or barriers exist in the way, what makes it hard now?*	The race data is scattered across multiple sources, making it hard to get a complete and visual understanding quickly.
because	*List the "root cause" of why the problem or barrier exists – what leads to the issue?*	There is no single, interactive and easy-to-use platform that brings together and visualizes all key Formula 1 data.
which makes me feel	*Describe the emotions from the customer's point of view – frustrated, confused, excited?*	Frustrated and time-consuming, because I have to check multiple websites to find the insights I need.

Reference: https://miro.com/templates/customer-problem-statement/

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Formula 1 fan	track real-time race results	the information is spread across multiple sources	there is no unified dashboard	Frustrated and confused
PS-2	A sports analyst / F1 follower	compare driver and team performance	it is difficult to analyze long-term trends	the data is not visually organized or interactive	Time-consuming and less insightful

Empathize & Discover

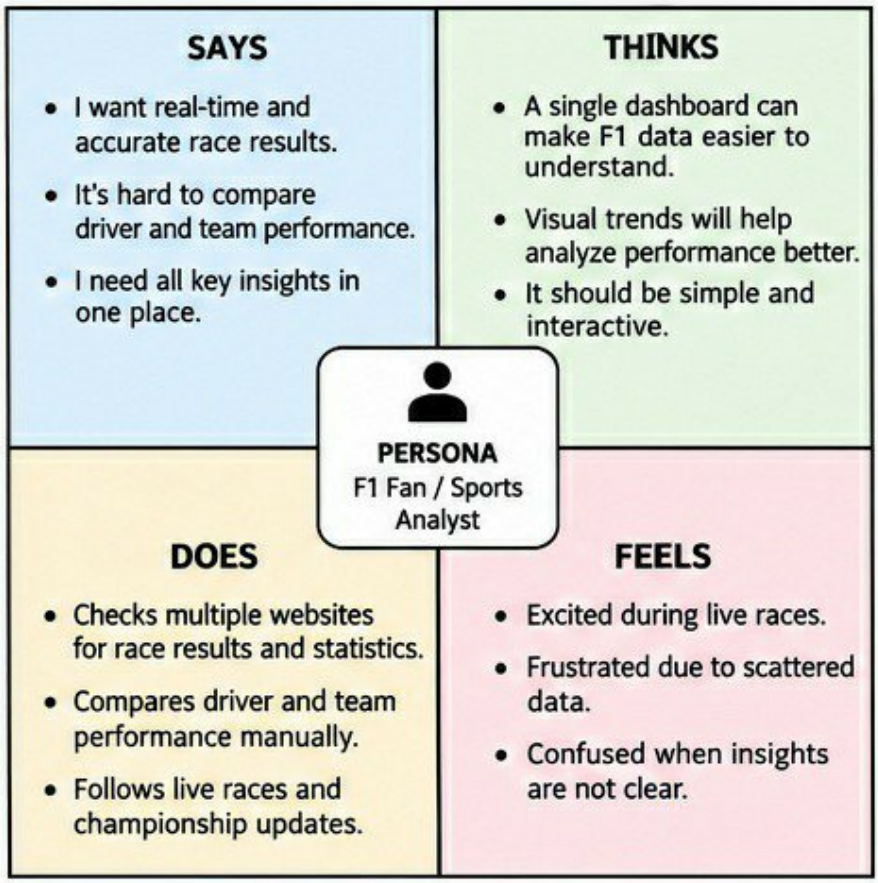

Empathy Map Canvas

Date	**01 November 2026**
Team ID	**SB-F1-01 (Individual)**
Project Name	**Formula 1 Race Intelligence Dashboard Analysis**
Maximum Marks	**4 Marks**

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it.

Customer Journey Map

Date	**01 November 2026**
Team ID	**SB-F1-01 (Individual)**
Project Name	**Formula 1 Race Intelligence Dashboard Analysis**
Maximum Marks	**2 Marks**

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1 (Discover)**	**Stage 2 (Analyze)**	**Stage 3 (Take Action)**
Actions *What does the customer do?*	• Searches for F1 race results and statistics. • Explores different sources.	• Views data and compares driver/ team performance. • Analyzes trends and season standings.	• Uses insights for discussions, predictions or analysis. • Shares findings with others.
Touchpoint *What part of the service do they interact with?*	• Web search (Google, F1 site, news, etc.). • Social media updates.	• Tableau dashboard (visual analysis). • Interactive filters and charts.	• Tableau Story (insights & summary). • Project website / GitHub link (access & share).
Customer Thought *What is the customer thinking?*	• "Where can I get all the F1 data in one place?"	• "How is my favorite driver performing over time?"	• "This dashboard makes F1 data clear and easy to understand."
Customer Feeling *What is the customer feeling?*	• Curious and hopeful to find a reliable source.	• Engaged and interested while exploring insights.	• Satisfied, informed and confident in the analysis.
Process Ownership *Who is in the lead on this?*	User / F1 Fan (Data Search)	Analyst / User (Data Exploration)	User / Analyst (Insight & Sharing)
Opportunities *How can we improve this stage?*	• Provide a single entry dashboard with all key data.	• Add more interactive filters and comparisons.	• Enable easy sharing and mobile-friendly access.

Project Design Phase-II
Data Flow Diagrams & User Stories

Date	01 November 2026
Team ID	SB-F1-01 (Individual)
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	4 Marks

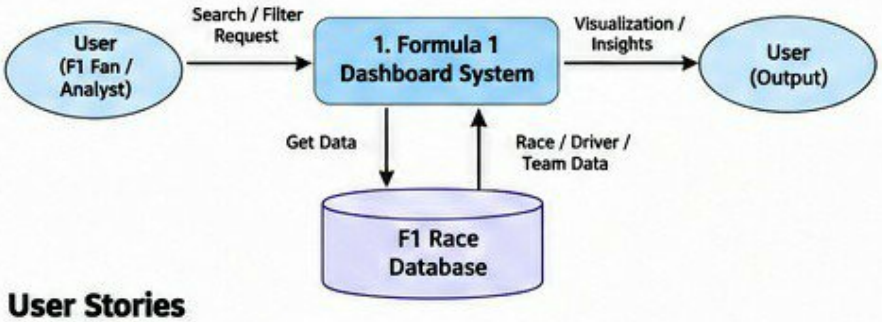

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Symbol Legend

Symbol	Name	Description
	**Oval / Rounded Shape**	**External Entity** – A person, organization, or system outside the project that sends or receives data (e.g., F1 User).
	**Rectangle with Numbered Header**	**Process** – An activity that transforms incoming data into outgoing data (e.g., Analyze Data).
	**Rectangle (Solid Fill, No Number)**	**Data Store** – A place where data is held for later use (e.g., Race Database).
	**Labeled Arrow**	**Data Flow** – The movement of data between entities, processes, and data stores (e.g., Race Data).

Level-0 DFD: Formula 1 Dashboard System

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (F1 Fan)	Dashboard Access	US-1	As a user, I can access the Formula 1 dashboard.	The dashboard loads and shows race data.	High	Sprint-1
	Data Analysis	US-2	As a user, I can filter data by season, driver and team.	Filters update the charts correctly.	High	Sprint-1
	Insights & Story	US-3	As a user, I can view a Tableau Story with key insights.	The story displays summary and visual insights.	Medium	Sprint-2
	Sharing / Access	US-4	As a user, I can access the project website and GitHub link.	The website opens and the GitHub link is accessible.	Low	Sprint-2

Project Design Phase–II
Solution Requirements (Functional & Non-Functional)

Date	**02 November 2026**
Team ID	**SB-F1-01 (Individual)**
Project Name	**Formula 1 Race Intelligence Dashboard Analysis**
Maximum Marks	**4 Marks**

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)	Priority (High/Medium/Low)
FR-1	Data Access & Integration	The system should collect Formula 1 data (drivers, teams, race results, standings) from a reliable source (e.g., Kaggle / F1 API) and integrate it for analysis.	High
FR-2	Data Processing	The system should clean, transform and prepare the data (e.g., handle missing values, format dates, create calculated fields) for visualization.	High
FR-3	Business Analysis	The system should analyze key metrics such as driver performance, team performance, win rate, podiums, and season trends.	High
FR-4	Business Insights & Analytical Outputs	The system should provide interactive visualizations (charts, graphs, summaries) to show insights like top drivers, top teams, race results, and championship standngs,	Medium
FR-5	User Interaction & Analysis	The system should allow users to filter and explore data by season, driver, team and race, with drill-down capability (e.g., from season → race → driver).	Medium
FR-6	Data Update & Reporting	The system should support data updates for new seasons/races and allow exporting or sharing insights (e.g., Tableau Story / Dashboard link).	Low

Non-Functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The dashboard should be simple, interactive and easy to navigate for all users.
NFR-2	**Security**	The data source and dashboard access should be secured (e.g., Tableau Public / GitHub with controlled access).
NFR-3	**Reliability**	The system should provide accurate and consistent results from the data.
NFR-4	**Performance**	The dashboard should load quickly and respond to filters within a few seconds.
NFR-5	**Availability**	The solution (Tableau Public / Web link) should be available anytime for users.
NFR-6	**Scalability**	The solution should be able to include additional seasons, races, or new analysis in the future.

Project Design Phase–II

Technology Stack (Applications & Tools)

Date	**02 November 2026**
Team ID	**SB-F1-01 (Individual)**
Project Name	**Formula 1 Race Intelligence Dashboard Analysis**
Maximum Marks	**4 Marks**

Define Your Technology Stack:

Identify the technologies, platforms, databases, BI tools, and integration that you will use to build your Formula 1 race intelligence solution. A well-chosen technology stack helps ensure that the solution is scalable, maintainable, secure, and suitable for data analysis and reporting requirements.

S.No.	Component / Category	Description	Technology / Tool	Justification / Purpose
1	Programming / Scripting (Data Preparation)	Language used for data cleaning, transformation and initial analysis.	Python (Pandas, NumPy)	• Easy data handling and preprocessing. • Widely used for data analysis.
2	Database / Data Source	Source of Formula 1 data (e.g., drivers, teams, races, results, standings).	Kaggle Dataset / F1 API (or CSV/Excel)	• Provides real and historical F1 data. • Free and easy to access.
3	Data Visualization / BI Tool	Used to create interactive dashboards, charts and stories for insights.	Tableau Public	• Powerful and user-friendly visualization tool. • Supports dashboards and data stories.
4	Web Platform (Integration)	Platform to showcase the project and embed the dashboard.	HTML, CSS, JavaScript (Basic Website)	• Creates a simple and responsive project website. • Can embed Tableau dashboard using a public link.
5	Version Control / Project Hosting	To store project files (code, website and documentation).	GitHub	• Tracks changes and manages project versions. • Easy to share and collaborate.
6	Deployment / Sharing	To make the final dashboard and web project accessible to others.	Tableau Public / GitHub Pages	• Tableau Public for interactive dashboards and stories. • GitHub Pages to host and share the project website.

Project Proposal (Proposed Solution)

Date	**02 November 2026**
Team ID	**SB-F1-01 (Individual)**
Project Name	**Formula 1 Race Intelligence Dashboard Analysis**
Maximum Marks	**3 Marks**

Project Proposal (Proposed Solution)

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and data.

Project Overview	
Objective	Build an interactive dashboard for Formula 1 to analyze race, driver, and team performance.
Scope	Develop a Tableau dashboard using publicly available F1 data (races, results, standings, and team statistics).

Problem Statement	
Description	F1 data is scattered across multiple sources, making it hard to get a complete, quick, and visual understanding.
Impact	Users spend more time collecting and comparing data, which leads to delayed and less effective analysis.

Proposed Solution	
Approach	Collect, clean, and analyze F1 data and build an interactive dashboard in Tableau Public with key filters and visualizations.
Key Features	Race results, driver and team standings, performance trends, season comparison, and a Tableau Story for key insights.

Project Design Phase-I
Solution Architecture

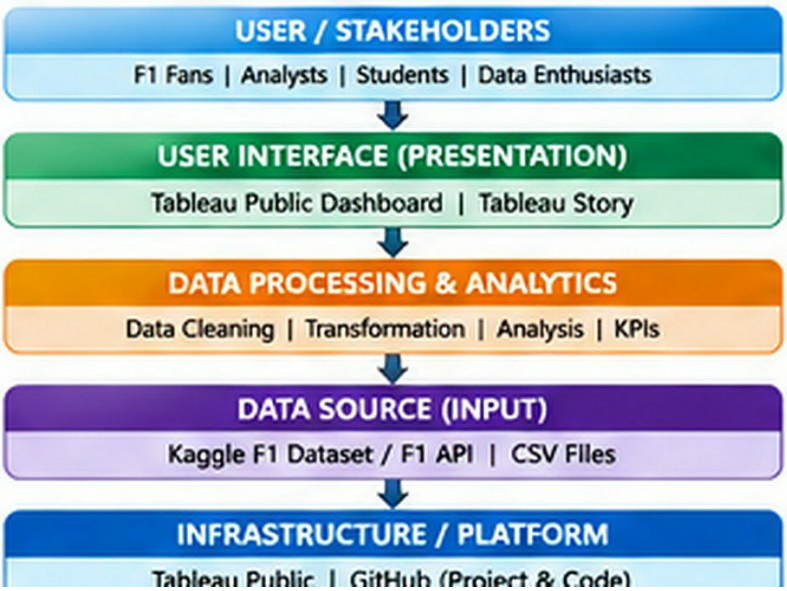

Date	**02 November 2026**
Team ID	**SB-F1-01 (Individual)**
Project Name	**Formula 1 Race Intelligence Dashboard Analysis**
Maximum Marks	**4 Marks**

Solution Architecture:

Solution architecture is a structured representation of how the solution is designed, the components involved, and how they work together to solve the business problem.

- Provide the best technical solution to solve the existing business problem.
- Describe the structure, components, behavior, and other aspects of the solution.
- Define key features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Sample Solution Architecture Diagram

SMARTBRIDGE
Let's Bridge the Gap

SKILL WALLET

Solution Architecture – Component Description

Component Description Table

Component Name	Description / Role in Architecture	Technology Used
Data Source	Provides raw Formula 1 data such as race results, driver and team standings.	Kaggle F1 Dataset / F1 API (CSV)
Data Processing	Cleans, transforms, and prepares data for analysis (e.g., filter, aggregate, create KPIs).	Python (Pandas)
Analytics Layer	Performs calculations and generates key insights (e.g., win rate, points, trends).	Python / Tableau Calculations
Visualization Layer	Creates interactive charts, dashboards, and filters for user analysis.	Tableau Public
Presentation Layer (User Interface)	Final dashboard and story for exploring F1 insights.	Tableau Public (Embedded / Link)
Platform & Hosting	Stores project files and makes the dashboard accessible to others.	GitHub (Code & Docs) / Tableau Public (Dashboard)

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware	Computing resources	Laptop / PC with 8 GB RAM (minimum)
Software	Data analysis and visualization tools	Python 3.x, Tableau Public
Libraries	Python libraries for data processing	Pandas, NumPy (optional: Matplotlib)
Data	Formula 1 dataset (races, results, standings)	Kaggle dataset (e.g., 2010–2024)
Storage	Space for datasess, code, and outputs	At least 5 GB (local or cloud)

Project Planning Phase
Product Backlog, Sprint Schedule & Stories

Date	**02 November 2026**
Team ID	**SB-F1-01 (Individual)**
Project Name	**Formula 1 Race Intelligence Dashboard Analysis**
Maximum Marks	**8 Marks**

Product Backlog, Sprint Schedule, and Estimation

The product backlog lists the features (Epics), user stories, and tasks. The work is planned across multiple sprints with story points and priority.

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority
Sprint-1	Registration / Access Setup	USN-1	Set up project and access Tableau Public, GitHub, and data.	2	High
	Data Collection	USN-2	Collect F1 data (Kaggle / API) and prepare the dataset.	2	High
Sprint-2	Data Processing	USN-3	Clean and transform the data (create KPIs, calculated fields).	3	High
	Dashboard Development	USN-4	Build interactive dashboard (race, driver, team, and trends).	4	Medium
Sprint-3	Enhancement & Story	USN-5	Add filters, comparisons and create a Tableau Story with insights.	3	Medium
Sprint-4	Finalization & Deployment	USN-6	Test, refine, and publish the final dashboard and project documentation.	2	High

Project Planning Phase
Project Tracker, Velocity & Burndown

Project Tracker, Velocity & Burndown Chart

Sprint	Total Story Points	Duration	Sprint Start Date (Planned)	Sprint End Date (Planned)	Story Points Completed (Actual)	Sprint Release Date (Actual)
Sprint-1	4	5 Days	02 Nov 2026	06 Nov 2026	4	06 Nov 2026
Sprint-2	7	5 Days	09 Nov 2026	13 Nov 2026	7	13 Nov 2026
Sprint-3	6	5 Days	16 Nov 2026	20 Nov 2026	5	20 Nov 2026
Sprint-4	4	5 Days	23 Nov 2026	27 Nov 2026	4	27 Nov 2026
Total	**21**	**20 Days**	–	–	**20**	–

Velocity:

Velocity is the amount of work (story points) completed per sprint. It helps to estimate how much work the team can deliver in future sprints.

$$AV = \frac{\text{Total Story Points Completed}}{\text{No. of Sprints}} = \frac{20}{4} = 5$$

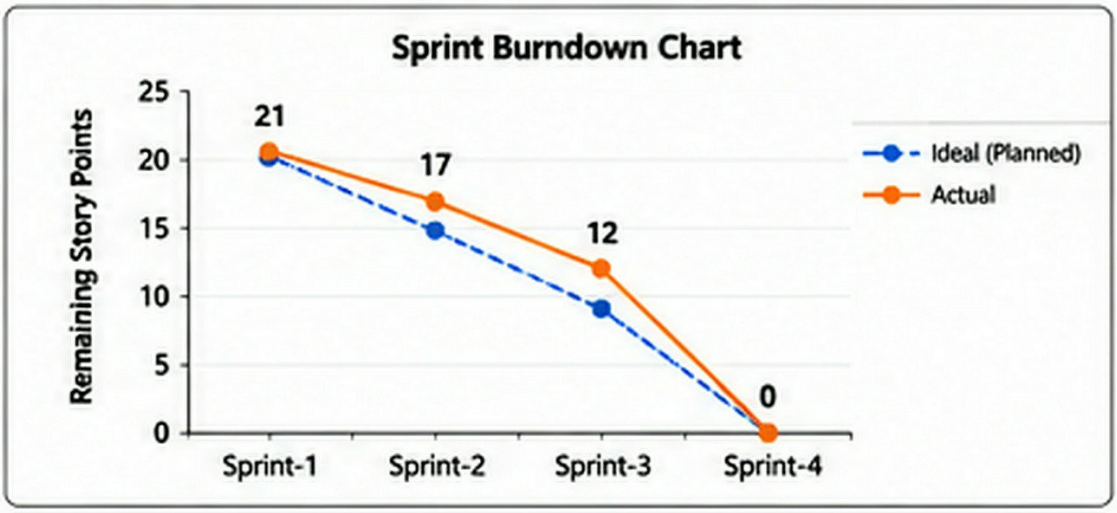

Interpretation: The team's average velocity is 5 story points per sprint.

Brainstorm & Idea Prioritization

Project Name	Formula 1 Race Intelligence Dashboard Analysis
Project Owner	Yashashwini Upadhyaya
Project Type	Tableau Data Analytics and Web Integration

Step 1: Brainstorm and Idea Listing

- Analyze Formula 1 racing trends using a Tableau dashboard.
- Compare team championship points and driver performance.
- Explain tyre-compound usage, race outcomes and retirements.
- Publish the dashboard and two stories on a responsive website.

Step 2: Idea Prioritization

- Group 1 | Interactive F1 dashboard | High feasibility | High importance | Priority 1 | Selected
- Group 2 | Tableau visual stories | High feasibility | High importance | Priority 2 | Selected
- Group 3 | Public web integration | High feasibility | High importance | Priority 3 | Selected

Empathy Map Canvas

Project Name	Formula 1 Race Intelligence Dashboard Analysis
Project Owner	Yashashwini Upadhyaya
Project Type	Tableau Data Analytics and Web Integration

Persona: F1 Viewer / Data Learner

- SAYS: I want clear comparisons and easy navigation.
- THINKS: Which teams are strongest across the dataset?
- DOES: Explores charts, filters, stories and rankings.
- FEELS: Curious about trends, frustrated by scattered data.

Key Insight

- A single interactive dashboard can make race intelligence accessible.

Define Problem Statements

Project Name	Formula 1 Race Intelligence Dashboard Analysis
Project Owner	Yashashwini Upadhyaya
Project Type	Tableau Data Analytics and Web Integration

Customer Problem Statement

- Formula 1 data is spread across multiple races, teams, drivers and statistics.
- Fans and learners need a simple way to explore performance patterns and compare results.

Point-of-View Template

- I am: a Formula 1 fan or data learner.
- I am trying to: understand team, driver and race performance.
- But: large racing datasets are difficult to interpret quickly.
- Because: raw tables do not reveal patterns clearly.
- Which makes me feel: overwhelmed by the volume of information.

Data Preparation

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	5 Marks

Data preparation cleans, standardizes, transforms and validates Formula 1 race, driver, team and circuit data for dashboard analysis.

Activity 1: Identifying and Handling Null Values

Inspect missing driver, team, points and race fields; investigate missing records before deciding whether to exclude or retain them.

Example SQL (adapt table and column names to the actual dataset):

```
SELECT COUNT(*) AS missing_driver FROM F1_RESULTS WHERE DRIVER IS NULL;
```

Output: Run against the project dataset to record actual results.

Activity 2: Duplicate Record Handling

Review duplicate race-driver combinations and remove only verified duplicate records.

Example SQL (adapt table and column names to the actual dataset):

```
SELECT RACE_ID, DRIVER, COUNT(*) FROM F1_RESULTS GROUP BY RACE_ID, DRIVER HAVING COUNT(*) > 1;
```

Output: Run against the project dataset to record actual results.

Activity 3: Data Cleaning and Standardization

Standardize driver/team spelling, whitespace, country names and numeric points fields.

Example SQL (adapt table and column names to the actual dataset):

```
SELECT TRIM(DRIVER) AS DRIVER, UPPER(TRIM(TEAM)) AS TEAM FROM F1_RESULTS;
```

Output: Run against the project dataset to record actual results.

Activity 4: Data Transformation and Validation

Aggregate points by driver and team, and validate totals against source records before visualization.

Example SQL (adapt table and column names to the actual dataset):

```
SELECT DRIVER, SUM(POINTS) AS TOTAL_POINTS FROM F1_RESULTS GROUP BY DRIVER;
```

Output: Run against the project dataset to record actual results.

Tableau Performance Test

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	Not specified

Project Development Phase — Performance Test

Testing checklist for the Formula 1 Race Intelligence Dashboard Analysis in Tableau Public.

S.No.	Parameter	Screenshot / Values
1	Data Rendered	Formula 1 race, driver, constructor and circuit records; counts not provided
2	Data Preprocessing	Cleaned names, validated data types and checked nulls/duplicates
3	Utilization of Filters	Season, driver, constructor and circuit filters (verify in workbook)
4	Calculated Fields Used	Total points, race count, average points (verify field definitions)
5	Dashboard Design	Driver leaderboard, team championship, driver reliability, world map and tyre distribution
6	Story Design	Suggested sequence: overview, driver analysis, team analysis, race geography

Actual load times, visual counts and story screenshots should be added from the published Tableau workbook.

Snowflake Performance Test

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	Not specified

Project Performance Testing

Record the observed values after running the project queries in Snowflake. No measured performance results were supplied.

S.No.	Parameter	Screenshot / Values
1	Data Rendered	F1 race, driver, team and circuit tables; record counts not provided
2	Data Preprocessing & Quality	Null, duplicate, trimming and standardization checks; results not provided
3	New Fields Created	Driver total points, team total points, race counts (proposed)
4	Filter Efficiency Test	Compare query times with and without race/season filters; not measured
5	Dashboard & Visualization Testing	Driver leaderboard, team performance, reliability, global race distribution, tyre mix
6	Query History	Highest execution-time query: not provided

Note: Insert screenshots and actual query execution times after testing.

Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	Not specified

1. INTRODUCTION

1.1 Project Overview: Formula 1 Race Intelligence Dashboard Analysis

1.2 Purpose: Explore race patterns and driver/team performance.

2. IDEATION PHASE

2.1 Problem Statement

2.2 Empathy Map Canvas

2.3 Brainstorming

3. REQUIREMENT ANALYSIS

3.1 Customer Journey Map

3.2 Solution Requirements

3.3 Data Flow Diagram

3.4 Technology Stack

4. PROJECT DESIGN

4.1 Problem-Solution Fit

4.2 Proposed Solution

4.3 Solution Architecture

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

6. FUNCTIONAL AND PERFORMANCE TESTING

6.1 Snowflake and Tableau Performance Testing

7. RESULTS

7.1 Dashboard Output Screenshots (insert supplied F1 dashboard)

8. ADVANTAGES & DISADVANTAGES

Interactive exploration; dependent on dataset quality and refreshes.

9. CONCLUSION

Summarize findings from the verified dashboard.

10. FUTURE SCOPE

Live data refresh, deeper race strategy analytics.

11. APPENDIX

Source code, dataset link, Tableau Public link (to be supplied).

Communication

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	1 Mark

Communication Plan

Suggested communication activities for the Formula 1 analytics project; confirm actual practices with the team.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team standup	Daily	WhatsApp / call	Project team	Review dashboard tasks and blockers
2	Progress update	Weekly	Shared notes / email	Team / mentor	Share Tableau and data preparation progress
3	Issue / bug discussion	As needed	VS Code / chat	Developer / mentor	Resolve broken filters, data types or visual errors
4	Stakeholder review	Bi-weekly	Screen share	Mentor / reviewer	Collect feedback on F1 insights
5	Final demo rehearsal	Once	Laptop + Tableau Public	Presenting team	Check dashboard and presentation flow

Communication Challenges

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	1 Mark

Communication Challenges & Resolutions

Potential challenges and proposed resolutions; not verified as completed.

S.No	Challenge Faced	Resolution / Action Taken
1	Data inconsistencies across race records	Check missing fields and standardize formats before analysis
2	Dashboard readability on small screens	Rearrange charts and simplify labels for presentation
3	Unclear interpretation of performance metrics	Agree on definitions and verify calculations with source data

Demonstration of Proposed Features

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	1 Mark

Feature Implementation & Demonstration

Features visible or suggested by the supplied dashboard screenshot. Implementation and demo completion need confirmation.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Global Grand Prix map	Map of race distribution by country	To verify	Not confirmed	Check country values
2	Driver leaderboard	Rank drivers by total points	To verify	Not confirmed	Validate point totals
3	Driver reliability	Compare DNF across drivers	To verify	Not confirmed	Check DNF definition
4	Team championship	Compare constructor standings	To verify	Not confirmed	Check season filters
5	Tyre strategy chart	Visualize tyre compound proportions	To verify	Not confirmed	Check source data
6	Country race analysis	Compare race distribution	To verify	Not confirmed	Test map interaction

Project Demo Planning

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	1 Mark

Project Demo Planning

Proposed 11-minute demonstration schedule. Assign presenters before submission.

S.No	Demo Section	Description	Duration	Responsible Member
1	Introduction	Problem: understanding F1 performance	1 min	Presenter: to assign
2	Solution overview	Explain data source and Tableau design	2 min	Presenter: to assign
3	Map and driver charts	Show country distribution, points and DNF	3 min	Presenter: to assign
4	Team and tyres	Explain constructor and compound charts	2 min	Presenter: to assign
5	Insights	Summarize observations and limitations	1 min	Presenter: to assign
6	Q&A	Answer questions and discuss next steps	2 min	Presenter: to assign

Scalability and Future Plan

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	1 Mark

Current System Limitations

Potential limitations to assess; not claims about the deployed dashboard.

S.No	Limitation	Impact	Priority
1	Static / manual refresh	Insights can become outdated	High
2	Limited interactivity	Difficult to explore complex comparisons	Medium
3	Source-data quality	Missing or inconsistent race records	High

Scalability Roadmap

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	1 Mark

Scalability Plan

Future roadmap: Phase 1 data validation; Phase 2 automatic updates; Phase 3 advanced driver comparisons; Phase 4 mobile optimization.

S.No	Scalability Aspect	Current State	Proposed Upgrade
1	User load	Tableau Public sharing	Optimize workbook and extracts
2	Data storage	Dataset-based analysis	Introduce automated validated refresh
3	Performance	Multiple interactive charts	Reduce expensive calculations
4	Security	Public dashboard visibility	Avoid uploading private or restricted data

Team Involvement

Date	2 November 2026
Team ID	Not provided
Project Name	Formula 1 Race Intelligence Dashboard Analysis
Maximum Marks	1 Mark

Team Involvement in Demonstration

Team member names, actual contributions, and participation must be confirmed.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation
1	Project owner (name pending)	Presenter	Overview and dashboard	Explain project objective	Planned
2	Team member (if assigned)	Data analyst	Data preparation	Explain cleaning and fields	Planned
3	Team member (if assigned)	Dashboard designer	Visualizations	Explain charts and filters	Planned
